PROFESSIONAL SUMMARY

Informatics graduate from President University with a 3.83/4.00 GPA, ranked 3rd, and Jababeka Scholarship recipient. Experienced in web development, frontend development, application development, IT operations, and technology projects across manufacturing and technology environments.

Hands-on experience developing web applications using JavaScript, React.js, TypeScript, Laravel, Vue.js, Node.js, and MySQL, with exposure to Python and Java development. Familiar with translating business requirements into application flows, designing responsive interfaces, developing reusable components, integrating APIs, managing application data, and troubleshooting technical issues.

Experienced in developing business and operational applications including inventory systems, digital platforms, and AI-powered web applications. Strong interest in full-stack development, application development, backend integration, and scalable web solutions.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, PHP, SQL, HTML5, CSS3

Frontend Development: React.js, Vue.js, AngularJS, Responsive Web Design, UI/UX Implementation, Reusable Components, Front-End Architecture, Fetch API, useEffect

Backend & Full Stack: Laravel, Node.js, REST API, API Integration, Backend Application Development, Server-side Development

Database: MySQL, SQL, Database Management, Data Processing

Development Tools: Git/GitHub, Visual Studio Code, Figma, Canva, Microsoft Office, Google Workspace

Web & Infrastructure: Website Deployment, Domain & Hosting, Basic Cloud/VPS Concepts, Basic SSL & DNS Concepts, Website Troubleshooting, Network Troubleshooting

PROFESSIONAL EXPERIENCE

PT Sinergi Cahaya Utama Indah — Jakarta, Indonesia

Dec 2025 – Mar 2026

Information Technology Intern / Frontend Developer

- Developed and implemented responsive web interfaces using React.js, TypeScript, JavaScript, HTML, and CSS based on business requirements, user flows, and UI/UX designs.
- Built reusable frontend components to improve consistency and development efficiency.
- Translated business and user requirements into application flows, page structures, and technical implementations.
- Implemented responsive layouts for different screen sizes and devices.
- Used JavaScript, Fetch API, and useEffect for application interactions and data retrieval.
- Collaborated with team members to identify implementation issues and improve application functionality.
- Contributed to the development of the Qurban Tanpa Batas (ZIS Indosat) application.
- Supported digital initiatives involving Figma, Canva, SEO, and AI-assisted development tools.
- Performed testing and troubleshooting to ensure frontend functionality and UI implementation met requirements.

PT American Standard Indonesia (LIXIL Group) — Bogor, Indonesia

Aug 2025 – Dec 2025

IT Support Intern

- Supported IT operations across Finance, Marketing, Production, Maintenance, and Warehouse departments.
- Troubleshoot hardware, software, network, peripheral, and user-related technical issues.
- Installed, configured, monitored, and maintained IT devices and infrastructure.
- Developed an internal JavaScript-based web application for IT inventory management and asset monitoring.
- Designed application flows and data management functionality to support internal IT operations.
- Coordinated with internal teams and external vendors regarding technical issues and IT services.
- Supported CCTV infrastructure across 6 factory and warehouse locations.
- Assisted in the disposal and documentation of 59 IT assets, including laptops, PCs, printers, and NVRs.

SELECTED DEVELOPMENT PROJECTS

AI-Powered Predictive Security Risk Analysis

Full-Stack Web Application | React / JavaScript / AI & Security

- Developed a web-based application for AI-powered information security risk analysis.
- Built web application functionality for text and document analysis, risk scoring, classification, and report generation.
- Implemented application features including authentication, session handling, security controls, and cross-tab functionality.
- Contributed to Google OAuth verification, risk scoring, threshold calibration, and threat-analysis scripts.
- Integrated security frameworks including ISO 27001, NIST SP 800-30, and FIPS 199.
- Supported NLP-based analysis using DistilBERT.
- Developed Smart Scan, Quick Text, file analysis, and risk-report generation workflows.
- Demo: ai-security-risk-analyzer.vercel.app

Inventory Web Application

JavaScript | Web Application | Internal Business Tool

- Developed an internal web application for IT asset inventory and monitoring.
- Designed input and data-management flows to support internal users.
- Implemented functionality for recording and monitoring IT asset information.
- Supported operational visibility and management of internal IT inventory.

Qurban Tanpa Batas – ZIS Indosat

React.js | TypeScript | Frontend Development

- Developed frontend features using React.js and TypeScript.
- Built reusable components and page structures based on business requirements and UI/UX designs.
- Implemented responsive interfaces and user interactions.
- Collaborated with team members to translate requirements into application functionality.

DebateLens – AI-Powered Debate & Argument Analysis

AI Web Application

- Contributed to development and testing of an AI-powered web application for debate and argument analysis.
- Supported feature evaluation, usability testing, and web application improvements.

ADDITIONAL DEVELOPMENT EXPERIENCE

Web Development: Developed responsive websites and web applications using modern JavaScript frameworks; worked with frontend architecture, reusable components, API integration, and application flows; familiar with Laravel, Vue.js, Node.js, React.js, and MySQL through development projects and technical practice.

Application Development: Java-based application development using NetBeans; Python-based programming and data-processing projects; database development and data management using MySQL; REST/API integration and web application communication.

EDUCATION

President University — Cikarang, Indonesia

2023 – 2026

Bachelor of Informatics | GPA: 3.83/4.00 | Ranked 3rd | Jababeka Scholarship Recipient

Thesis: AI-Powered Predictive Security Risk Analysis

Relevant Areas: Software Engineering, Web Development, Database, Information Security, Business Process Analysis, Distributed & Parallel Computing

CERTIFICATIONS

KKNI Level II Multimedia Certification — BNSP | PESC English Certification — Score 5.5 | EF English Conversation Certificate

LANGUAGES

Bahasa Indonesia — Native | English — Intermediate

ADDITIONAL INFORMATION

- Available for full-time employment
- Willing to work on-site / relocate to Jakarta
- Experienced working independently and collaboratively
- Experienced collaborating with internal teams and external vendors
- Portfolio and web application projects available for review
